About Us

Since 1979, Heritage Arts has stood as one of Cochin's most revered antique establishments. Heritage Art & Architecture is its natural evolution, carrying forward decades of curatorial excellence into the world of bespoke furniture and interior design.

At Heritage Art & Architecture, history and artistry find their finest expression.

Our Philosophy

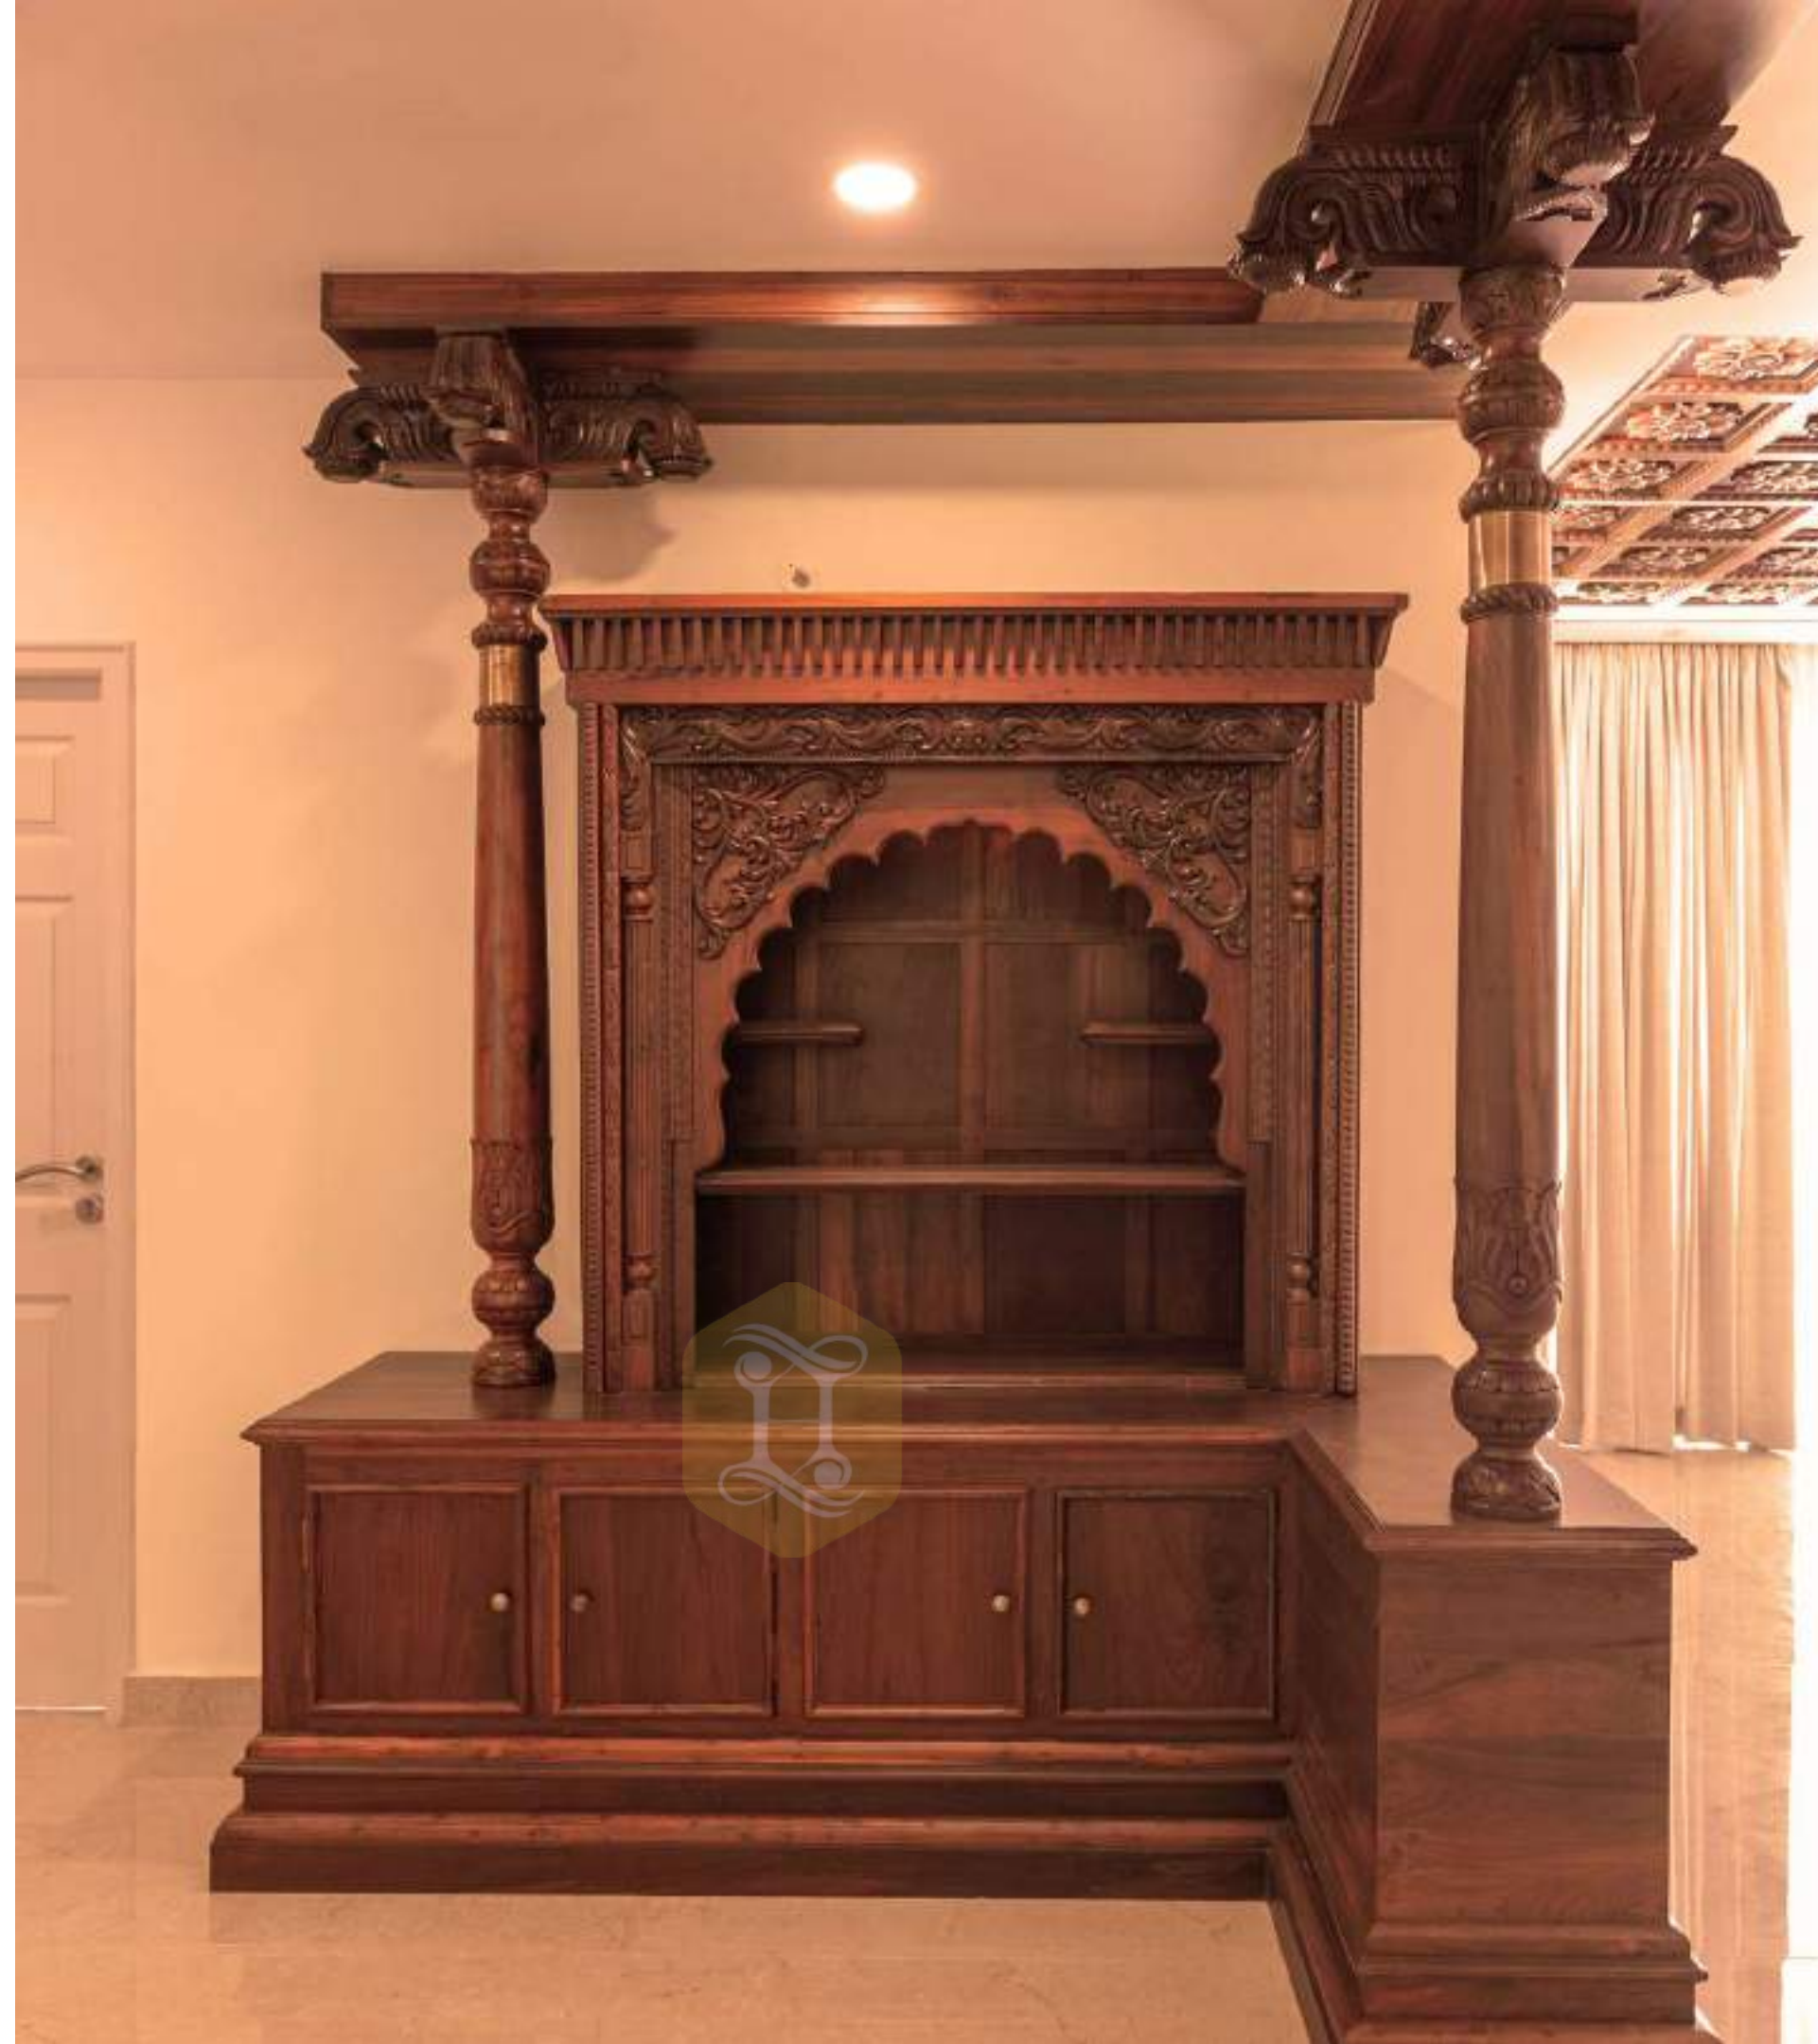

Craft. Heritage. Soul.

Our work is guided by the belief that good design is intentional. We create interiors where every element belongs, furniture that complements the architecture, and woodcraft shaped by precision, care, and respect for the material.

Heritage Interior Solutions

**Modern.
Functional.
Vintage Reimagined.**

A design philosophy that honours the past without being bound by it. At Heritage, antique sensibility meets contemporary living, and every space is as beautiful as it is liveable.

Here, Tradition Meets Contemporary Living...

Concept

Every project begins with a conversation about how you live, what you love, and the story you want your space to tell. We translate that into a design direction that is distinctly yours.

Design

Our in-house designers craft interiors where traditional craftsmanship and modern function coexist without compromise.

3D Visualisation

Before a single nail is driven, you see your space in full — every material, every proportion, every light source rendered with precision.

Manufacture

From workshop to wall, every furniture piece and fixture is crafted in-house, in authentic teak, cane, and brass.

Installation

We don't hand over a flat-pack and leave. Our team oversees every placement, every finish, every final detail, until the space is exactly as it was imagined.

Custom Furniture

Made to Last. Made for You.

We do not design for seasons.

Every piece is designed around your space, your life, built to become the heirloom your home deserves.

Our forms are drawn from the deep well of Indian and colonial craft traditions — silhouettes that have outlasted every trend and will outlast the next.

Custom

Pillars

A photograph of an antique collection in a room with red walls. In the center are two large, dark, rounded earthenware pots. Behind them is a white ceramic horse sculpture with a red tassel on its head and a decorative collar. To the right is a lion sculpture with a large, dark, fringed mane. In the foreground right is a large, bell-shaped metal object. The background features a wooden lattice screen and framed niches. A faint 'iH' logo is visible on the right side of the image.

ANTIQUE Collections

At Heritage Arts, discover — something
old, something *singular*, something that
was *always meant to find you*.
